Figure 26. The above graphic illustrates the 100 year trend from 1900 to 1999 for the historical reconstruction produced as part of the Coupled Model Intercomparson project --Phase 5 or CMIP 5. Results for CNRM-CM5 model is shown in the upper panel and the difference with Berkeley Earth Land Temperature is shown in the lower panel. CNRM-CM5 is a product of Centre National de Recherches Météorologiques / Centre Européen de Recherche et Formation Avancée en Calcul Scientifique. The lower panel depicts the difference in trends between CNRM-CM5 and Berkeley Earth Land Temperatures. The Root Mean Square is calculated at the grid level.
